

TRU-PINE[®] for Pets

Canadian Pine Bark Extract Formula

What is in our Tru-Pine[®] formula?

TRU-PINE[®] is a proprietary formula containing white pine bark (*Pinus strobus*), rose hips fruit (*Rosa canina*) and vitamin C. When combined, the ingredients are synergistically enhanced.

White Pine Bark Extract (*Pinus strobus*)

Research has shown that pine bark contains high concentrations of proanthocyanidins, which are commonly known as OPC's. OPC's are a class of bioflavonoids which contain antioxidant properties.

Rose Hips (*Rosa canina*)

Rose hips have been used as a source of food for centuries by the Native people of Canada. Rose hips contains vitamin C, vitamin E and vitamin K.

Vitamin C (Ascorbic acid)

Vitamin C is vital for the formation and maintenance of healthy connective tissue, amino acid metabolism and protection from chemicals. During stress, an additional source of vitamin C helps pets to maintain healthy levels of vitamin C.

475 Years of Canadian Pine Bark History:

TRU-PINE[®] for Pets is a proprietary Canadian Pine Bark Extract formula made from the original preparation given to Jacques Cartier and his men by the Native people of Canada in 1535-1536. TRU-PINE[®] for Pets is the only known pine bark product to source its materials from the same pine trees used in the original formula. The original pine tree grows in Canada's boreal forest in remote areas free of pesticides and insecticides.

The technology used to produce TRU-PINE[®] for Pets was researched for more than a decade by Canadian scientists, resulting in a uniquely balanced pine bark formula and a state-of-the-art extraction process.

The proprietary upright water extraction process preserves the integrity of the source material, producing a pure and clean extract without the use of solvents. TRU-PINE[®] for Pets is produced in a cGMP (Good Manufacturing Practice) compliant facility and is uniquely prepared to ensure consistent quality.

Remember, your pet relies on you to maintain good health!

TRU-PINE[®] for Pets

Canadian Pine Bark Extract Formula

Giving TRU-PINE[®] for Pets to your dog and cat...

TRU-PINE[®] for Pets is made from Northern Canadian Pine and is manufactured only in Canada. Our new TRU-PINE[®] for Pets capsule formula was made with your pet's well-being in mind, easy and convenient to take.

The TRU-PINE[®] for Pets capsule formula can be given with a small amount of food, or simply use a convenient 'pill pocket' that you can find in your local pet store.

The following chart will give you the suggested daily amounts for your pet's weight.

WEIGHT	QUANTITY
Up to 25 lbs.	½ capsule daily
Over 25 lbs.	1 capsule daily

CAUTION: For prolonged use consult your veterinarian.

Why antioxidants are important for your pet...

Antioxidants play an important role in helping to maintain healthy cells in your pet's body. They help neutralize free-radicals, which are chemicals that damage healthy cells in the body.

The pine bark selected to produce TRU-PINE[®] for Pets is harvested from Canada's virgin forests during timber production. The pine trees are aged between 10-20 years which ensures the highest possible concentrations of antioxidants. The water extraction process retains 95% OPC's (Oligomeric Proanthocyanidins) which makes this a good source of antioxidants for your pet.

Where are antioxidants found?

Antioxidants are found in the skins and seeds of many fruits and vegetables and also in pine bark. One of the highest concentrations of antioxidants is found in Canadian Pine trees. TRU-PINE[®] for Pets provides your pet, nature's freshness with every capsule.

Remember, your pet relies on you to maintain good health!
